Experience

Fintech Solutions

May 2023 - Present

Dotnet Developer

Kathmandu, Nepal

<https://fintech.com.np>

- Developed and maintained ASP.NET Core web APIs and console applications integrating external APIs and connecting to PostgreSQL databases
- Worked on remittance projects such as iSend, iSend B2B, iPayHub, Chariot, Bhutan National Bank, Blockgration and others designing and building RESTful APIs for core money transfer flows
- Integrated third-party payment gateways and other external platforms through API calls and SDKs, including:
 - ShuftiPro**: Implemented KYC verification processes
 - Zai and Monovaa**: Facilitated payout functionalities
 - Finicity**: Integrated financial data aggregation services
- Worked with integration of Core Banking Systems of external banks like Bhutan National Bank.
- Created stored procedures, views, and other database objects in PostgreSQL to support application functionality
- Designed background jobs and schedulers using Hangfire to enable asynchronous processing
- Implemented unit and integration testing using xUnit and test doubles to ensure code quality
- Participated in code reviews, design discussions, and implementation planning sessions
- Troubleshoot issues reported by QA and customers related to transactions, reconciliations, and data consistency
- Contributed to CI/CD pipeline by configuring GitHub release pipelines
- Some experience in working with serverless architecture using AWS

International Money Express

October 2022 - May 2023

Dotnet Developer

Kathmandu, Nepal

<https://imeremit.com.np/>

- Developed and maintained C# web applications and services utilizing ASP.NET Core Web API, Web Forms, SQL Server, and Entity Framework
- Created database objects including stored procedures, views, and functions to support critical remittance processing application functionality
- Worked on remittance platform managing money transfers supporting a network of agents and customer portal enabling transfers to over multiple countries
- Implemented new features like external bank API to ensure seamless remittance.
- Coordinated with team of developers, business analysts and QA testers in an Agile/Scrum environment to deliver high quality solutions
